

WORKSHOP

Machine Learning in Economics

May 11, 2023

Location | Hertie School Berlin

This workshop brings together economists of the Berlin area who (want to) apply machine learning or work on the theory of machine learning.

The workshop will include several talks by local researchers and a keynote lecture by **Michael C. Knaus** (University of Tübingen).

If you would like to present your economics work in applied or theoretical machine learning, please submit a paper draft or an extended abstract until the registration deadline under maxand@europa-uni.de.

We encourage early career researchers to present their work. We will provide feedback regarding the acceptance of your paper by April 15.

Please note that there is only a limited number of slots for participants who only attend the workshop without presenting.

We are looking forward to your submissions!

Silke Kaiser · Hertie School

Timm Boenke · DIW Berlin

Jan Marcus · FU Berlin

Simone Maxand · Europa-Universität Viadrina
